

point of sale professional

for MAS 90® & MAS 200®

Be More Than Just a Store

Equip your cashiers and customer service representatives with the software designed to handle the fast-paced needs of the retail environment. Manage all your store locations, improve customer service, and access important financial information at any moment! Point of Sale Professional is the perfect solution for any wholesale business, retail store, video rental facility, or health club in need of an effective method of operations at the point of sale.

With its outstanding user-interface designed to mirror and streamline the retail transaction process, Point of Sale Professional allows your stores to complete standard retail transactions while tying the data into your MAS 90® or MAS 200® accounting, distribution, and manufacturing system. Transaction types included cover all facets of the retail industry, such as sales, returns, layaways, orders, quotes, and customer payments. Point of Sale Professional also supports membership and rental facilities by tracking membership attendance and rented items by customer.

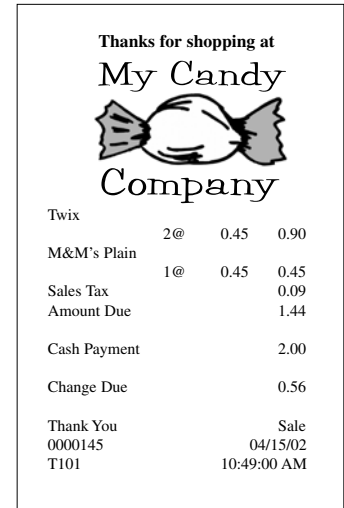

Use the latest industry-standard hardware for retail businesses with your Point of Sale Professional software! Point of Sale Professional supports cash drawers, receipt printers, magnetic stripe credit card readers, check readers, bar code scanners, pole displays, and scannable ID cards.

Transform MAS 90 or MAS 200 for Retail

You can integrate Point of Sale Professional with the MAS 90 and MAS 200 Accounts Receivable, Inventory Management, General Ledger, Bank Reconciliation, Sales Order, and Credit Card Processing modules, to streamline your retail business procedures. For example, when you update a customer's address, credit, or contact information through Point of Sale Professional, the updated data becomes available in the Accounts Receivable module.

Any financial data posted from

Point of Sale Professional is updated to the accounting modules of the MAS 90 or MAS 200 system. Any inventory used in Point of Sale Professional transactions is updated in the Inventory Management module of the MAS 90 or MAS 200 system.

Integrates with:

- Accounts Receivable
- Inventory Management
- Sales Order
- Bank Reconciliation
- General Ledger
- Credit Card Processing with PCharge by GO Software
- Multi-Bin Advanced Distribution

Compatible with:

- MAS 90®
